We wish to object to the latest proposal for 61 dwellings and 78 parking spaces.

We object to the increased number of dwellings because of the excessive height. Including the basement, the buildings at the west end will be 7 storeys high. This is out of scale with the the existing buildings in Holmfirth.

So many parking spaces will entail many more vehicle movements on Lower Mill Lane, which was obviously not designed for through traffic. The junction with Hollowgate adjoining the Elephant and Castle PH. is already congested and unsafe for pedestrians. There is no evident distinction between private and public car parking. Are the 22 new spaces shown on the extension of Lower Mill Lane to be public or only for the new residents?

We approve of the re-routed riverside walk proposal. This increases the need for improvement to the pedestrian pathway at the junction with Hollowgate.
