Do you wish your comments to be published on the website anonymously?	Yes

I have seen both sets of comments online and come to the conclusion that this mosque has been successful in its mission to disrupt and divide our community.

It has come down to the mosque doing a petition that was religiously and emotional motivated by making its users and some of the local Muslim community feel like they have a duty to support the mosque regardless of it being wrong in its plans.

This application when put forth many years ago under slightly different plans still is prolonging for reasons unknown to the council and the community, the highways are dangerously and severely affected by congestion that the council should be aware of already.

Just out of curiosity, Has the council closed the parking enforcement office? We have seen none for many many months.

Religion is being used as a form of blackmail to getting permission, councillors are being approached and being pressured into supporting this application.

Kirklees council is making 750 redundancies, which will affect the highways, and parking departments also, who will deal with the traffic congestion that will get worse if this application is approved?

Those who support this whether it be the mosque’s users or the council, councillors and planning committee can a signed legal document be provided to those on Ravenshouse road providing details on who will be responsible for the future problems faced. On How they will be dealt with and the time frame, also who will be responsible for any accidents and injuries that local residents and passes by may incur by this development and Damages to local businesses that will be affected by this development.

Thank you
