With effect to this planning application. I am confused. This is not new Mosque neither new planning application. The application is continuing for some time. My question is one of that rather than continuing to submit new information or in this case they want a double storey Mosque. In Pilgrim Estate there is big Mosque and they are building a new building on side of the current Building which will be soon complete. They have no issues and no one has ever complained. Its a great building. They provide most Community services like Community meeting rooms council and Police Surgeries for residents and a library. The place is open for all Communities. I have seen nothing on Ravenshouse Road Mosque that will be helpful to anyone but they have one thing that is to local Communities. No need for that ? Why need a double storey Building. What services are they going to provide. Because I think they need to sort the current problems. People who bring cars to drop children and pray. These people have no respect for any one like children pedestrians and other travellers on Ravenshouse Road. I have witnessed on so many time the Arriva bus can't get through because of them. Rather fighting for planning they need to sort traffic issues which have been going for past 6 years to 9 years I know off. Can I remind Kirklees planning officers of course you have the firm power of Authority and if you accept their case then planning can be granted no drought. They now have their he MP for Batley and Dewsbury. I would have thought they know better. Or Least. But I am afraid they have no solutions but create problems. What else can I say?
