

I would like to update you all on what we continue to face. We have read the comments and feel this should shed light on the traffic issues and the constant harassment we face as some members of the council may believe the false comments about there being no traffic or parking issues.

In the photos I see no mosque parking attendants, I see no parking officers and I see no resolution.

As we understand everybody has a right to place a comment, but for those putting in false supporting comments about how there is no traffic and parking issues and that the mosque parking attendants are out "controlling traffic" for the council I send these photographs. They should clearly show the problems we have now and should paint a clear picture of how much worse the future will look like should permission be given by the council especially for us at the shop/our customers and deliveries as we are next door to this mosque. All this traffic and blockages are happening with the car park fully in use.

Our shop is indeed targeted by the mosque to cause us stress, damage to our buissnes and harassment. Yellow lines and zebra crossing violations, blockages to our shop all caused by the mosque. I ask the planning department and officers to refuse this as parking enforcement can not deal with this as it is.

If for some reason the council were to pass this application, all we ask is to receive in writing that any problems we face the council would be solely responsible.

Sarah, Could you please upload this on the comment section online.

Thank you
