<p>There are several reason as to why building should not go ahead. such as a narrow lane which leads to a ginnel and is a public right of way and used by horses and cyclists and would therefore be dangerous. There are drains in the field along with a well is not looked after therefore causing a lot of water to run from the field down the lane. Wildlife will be affected yet again of which there is plenty. Mount road is busy enough with it being a short cut from the A62 and drivers speeding up and down as there is no calming measures surprised no one has been killed or had a serious injury. With 2 buildings already been built above has added to the water problem</p>
