During the site visit it was noted that the post and rail fence along the site frontage is incomplete. Also, the footway entering the site runs along an embankment. The drawings do not show if the post and rail fence will be completed and does not show any fencing along the footway to protect pedestrians from the embankment. A lack of suitable fencing will increase both the risk of pedestrians and cyclists	Provide appropriate fencing both along the site frontage and the access road.	Appropriate fencing will be added to the architects and the access drawings.
