<p>I object very strongly to this application, on the following grounds:</p> <p>a - the use of good BMV farmland, graded 2 and 3a currently contributing to food production.</p> <p>b - The openness and beauty of the countryside being threatened by the building of an industrial installation.</p> <p>c - Disruption and damage to hedges and wild life habitats caused during installation and for the life of the project. Stated to be 40 years (a lifetime for many).</p> <p>d - Current footpaths, byways and bridleways being negatively affected by the erection of high security fencing, cctv, cameras.</p> <p>e - It will be in effect the second solar farm in this area, incredibly close to the other at Low Farm and sharing the same connection.</p> <p>If you permit this application to go through you will be damaging this beautiful area permanently.</p>
