Dear Sir/Madam

I would like to emphasise the beneficial impacts that the development of new dwellings on the overgrown plot at rear of no 18 Kingsley Avenue can have on both the community and local businesses.

- This transformative process provides a variety of benefits that contribute to the area's growth and vibrancy. The implementation of housing projects not only boosts economic growth by recruiting enterprises and creating job possibilities, but it also increases on foot traffic to local stores and services, thereby revitalising business activity.
- This expansion helps to revitalise communities, diversify businesses, and improve local services, resulting in a more vibrant and engaging economic landscape.
- The collaborative nature of the development process stimulates community engagement, allowing businesses to better meet the changing requirements of the growing population.
- This expansion fosters a feeling of community, cultural enrichment, and long-term investment, producing an atmosphere that benefits both businesses and residents. I want to remain anonymous.

Thank you
