Planning ref 2023/91907

In regards to this proposal I would like to comment in favour. I believe this would have a positive effect on the area as a whole. I do realise there would be some disturbance for a short while but the benefits would outweigh this as this will be providing much needed housing to families big and small. As I understand the development is close to transport links and local amenities and is an excellent proposal for the future of this area. I understand several trees and bushes are to be removed to allow for the road however to offset this several trees are to be planted in the rear gardens and green spaces, which will also improve the amenity space on site. I wish to remain anonymous.

Thank you
