Subject: Planning reference 2023/91907

Dear Sir/Madam,

Ref: 2023/91907

I'm writing to point out the several advantages of transforming the overgrown plot into a residential area. This project optimises land usage, reduces urban sprawl, and provides a viable solution to housing shortages. It also encourages economic growth by increasing business activity and creating jobs, while property values rise, benefiting both existing homeowners and newcomers. These advances encourage social contacts, cultural exchange, and a sense of belonging, promoting diverse and vibrant communities. Infrastructure improvements, better amenities, and green areas all contribute to a higher quality of life while adhering to sustainable practises that protect the environment and promote biodiversity. Can I remain anonymous please thank you.
