<p>The fact this is still being considered is ridiculous. The parking in the street has gone worse since last time so I'm not sure what type of analysis has been done we have a small drive for just two cars and guests regularly have to rely on on street parking which is never available due to other people parking on the road from Yews Hill Road or even David brown factory. Some of the workers have now started parking at the bottom of the street causing havoc. Besides this the traffic around this area is getting out of hand and will only get worse if this application is approved. I don't mind there being 10 new houses for the homeless people, quite frankly I'm with the idea however don't feel it is appropriate in this already overcrowded area. Construction like this needs to be completed in a more appropriate slightly secluded area where it would make more sense and allow people to breathe a little rather than living in such confined places. There are so many other surrounding areas where this plan would make sense where it would not impact local residents negatively so I don't understand why you would even consider this. Literally feels like a joke of an application if I'm honest. Final thing to add I don't understand why some of the comments made are from people on the other side of Huddersfield where it obviously won't effect them. They are going to be with the construction as it has no impact on their day to day lives.</p>
