<p>In keeping with the already captured objections from others My objection is based on environmental health and public health concerns The sign off from the relevant department does not clearly state how the decision was arrived at Industry guidelines have no doubt been followed , however there is an unknown health implication of a 5G mast & I would ask an extended period of time is allowed for the council to hold a public consultation meeting with issue experts to explain the decision Guidelines would suggest proximity to housing should be considered - I do not believe this has been followed here The fact there is this guidance does imply there is an unknown health risk Should this application ultimately be fully approved I would hope that it could be done following the widest public consultation possible with all concerns addressed MP Mark Eastwood has been asked to intervene to provide support for an extended period of consultation and more transparency within the environmental health report</p> <p>Thank you</p>
