<p>The planning application includes demolishing 5.00m of the boundary wall adjacent to the highway on Cuckoo Lane. The wall has historical value and needs to be conserved and protected. This wall is situated in a conservation area and partially demolishing it to provide parking would have an impact on the character and appearance of Cuckoo Lane.</p> <p>The planning application also includes demolishing a dry stone wall on Thirstin Road for car parking which is also in the conservation area and needs to be conserved and protected.</p> <p>There has been a recent planning application close by to this property to demolish the boundary wall adjoining the highway to provide a parking space and they were refused as should this application.</p>
