<p>Parking is often a challenge around Cuckoo Lane, so two additional parking spaces would be very welcome. 5m of the wall would need to be removed, but the wall in question has already had to be repaired after falling down a number of years ago and this is an opportunity to provide a sympathetic solution to meet conservation area requirements and enable the additional parking. The level of the garden is below the road so it would be likely that the parked cars would not be visible from Cuckoo Lane.</p>
