| <p>directly behind<br/>apartments , all inhabited by senior citizens , with various medical issues , and anxieties regarding the proposed planning of the aforementioned site . This area is already suffering from parking issues , and increased volume of traffic due to the houses being built just beyond the area where the Proper Maid building is situated . We have a school there , a nursery , and a doctors surgery , and many pedestrians in this area are very young children , parents , and very elderly residents who have mobility , hearing , and sight issues .<br/>On top of this , we have a doctors surgery , attended by the local residents , many of whom have impairments , mobility issues and it is absolutely not appropriate to try and manoeuvre huge lorries and other vehicles , who would struggle for space, In a very limited turning area , and would have to reverse into the area by Proper maid , having first blocked the entire road and pulling close to the doctors surgery building . It is completely inappropriate for this planning to go ahead, and. Old have a direct , and very adverse affect in the local residents and community .</p> |    |
