

## **Requested works:**

- T1 - maple: 20% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T2 - ash: 20% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T3 - beech: 20% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T4 - ash: 20% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T5 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T6 - beech: 20% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T7 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T8 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T9 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T10 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T11 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T12 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T13 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T14 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T15 - lime: Re-pollarding following previous pollarding work done before the house was sold to the current owners
- T16 - beech: Removal - this is a relatively young tree seeded from the larger trees that has grown significantly recently
- T17 - beech: 25% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T18 - beech: 25% crown reduction and removal of lower branches, to increase light to house, maintain tree health and moderate tree size relative to house
- T19 - beech: 25% crown reduction and removal of lower branches, to increase light to house, maintain tree health, moderate tree size relative to house, and reduce impact on neighbouring driveway
