<p>As a resident of Moor Lane, the levels of traffic passing through is already far too high. The residential street is used as a rat run, with cars flying up and down quite dangerously. Building more houses in this area will lead to more traffic in an already built up area.</p> <p>One half of the street requires residents to park on the street with limited spaces, the addition of more homes is only going to add to this issue and cause cars to park unsafely and cause issues getting emergency vehicles up and down Moor Lane. This planning was already rejected once before and it should not be allowed to go ahead.</p>
