<p>I'm a bit confused about why this application has been resubmitted when the previous application was rejected??</p> <p>The reason I am opposing it are the same as before.</p> <p>Moor Lane is already a very busy road used by school children going to BBG Academy and Gomersal Primary School. There are already significant road safety issues on this road including only 1 pavement -without the addition of these extra houses.</p> <p>This application will increase the risk of a serious accident occurring on this road, which could easily involve innocent children going to school.</p> <p>This application should be rejected. The previous concerns have not been fully investigated and overcome with this application.</p>
