

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	
Site Address	
Description of Development	

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

The applicant may integrating solar panels, both Photovoltaic (PV) for electricity generation and solar thermal for water heating, will efficiently harness solar energy, reducing electricity and water heating costs. The applicant may also install visual display to inform occupants about the production of hot water and electricity to encourage responsible energy usage and enable them to make the most of the free energy available within their homes via solar panels. By incorporating these measures, the proposal may not only reduce its environmental impact but also create a more sustainable and cost-effective building.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
