<p>Spen Valley Civic Society wishes to record its comments as follows. "We regard the Span Valley Greenway as a major asset in our valley. We therefore have no objection to improvements. We note that the section to be improved is one of the lesser-used parts of the route, compared to the busiest section from Cleckheaton to Heckmondwike. We do have concern about removing barriers from the two access points because there is already a big problem on the Greenway caused by people on motorbikes, quad bikes and electric vehicles. There are insufficient Police to intervene, so those people making the Greenway less safe for other users are not deterred. We would like to know how Sustrans proposes to mitigate this issue.</p>
