Subject: 2023/92140 Redesigning barrier access at Green Lane

Dear Sir/ Madam

I object to the proposal to widen the Greenway access from Green Lane, Oakenshaw. I also don't understand why the Greenway itself needs widening. Surely to maintain the vegetation on either side.

My daughter occasionally gets me to use the Greenway to walk on a flat surface that isn't next to the traffic of Bradford Road. In the future I may be using the Greenway.

I would class myself as I am so frightened of falling so if the Greenway is going to be made easier for motorbikes and quadbikes to get on there, then I am unlikely to use it. They are scary enough when they use Bradford Road.

I'd like to know that whatever improvements are being made they will keep my daughter safe when she uses it and therefore other pedestrians.

Please I ask you to consider the consequences of doing this and review this part of the Greenway improvement plan

Yours faithfully

(Kirklees resident)
634 Bradford Rd, Oakenshaw, Bradford BD12 7EN, UK
