As a local dog walker, I support for the planning application submitted for the removal of part boundary wall to make vehicle access. I firmly believe that this aligns with our community's best interests, as it addresses critical safety concerns related to roadside traffic, without compromising our local wildlife habitats. The deterioration not only diminishes the overall aesthetic of our neighbourhood but also jeopardises public safety. With the wall in disrepair, there is heightened risk of accidents and injuries, particularly for this travelling along the footpath. The proposed removal of part boundary wall will rectify this issue by ensuring a structurally sound and secure boundary. Importantly, this proposal is carefully planned to minimise any potential negative impact on the wildlife community. I have conducted a thorough environmental assessment, and I am pleased to report that the proposed reconstruction has been designed with ecological sensitivity in mind. It avoids disturbing any sensitive habitats or endangering local wildlife populations. This project has been reviewed by environmental experts as shown in the survey, to ensure that it complied with all relevant conservation and wildlife protection regulations. In fact, this reconstruction could even enhance the habitat by incorporating wildlife friendly features, such as bird nesting boxes or planting native species along the boundary. There is a unique opportunity to improve the safety of our community's infrastructure while demonstrating a commitment to environmental responsibility.
