Subject: High vehicle movement - Planning concern - Dogley Mills (2023/92389)

Hi

I am writing to check that the seasonal vehicle movements have been considered for the Firework shop application at Dogely Mills, Penistone Road, HD8 0LE.

I have no objections to the shop or change of use, but I am concerned that the amount of traffic will not have been taken into account and the impact this could have on the neighbours, but more importantly the safe exit from the steep access road onto the fast main road.

If you request the information, you will find there is approx 1000 cars within a 3-4 day period, with the peak day attracting around 400-450 visitors.

I was too late to raise my concern on your website.

Regards
