

## **Appendix A – Climate Change Statement**

### **Climate Change Statement for Planning Applications**

#### **Part 1: Applicant details**

|                            |                                                |
|----------------------------|------------------------------------------------|
| Name of applicant/agent    | Katie Wallace                                  |
| Site Address               | 30 Pyenot Hall Lane<br>Cleckheaton<br>BD19 5AZ |
| Description of Development | Single story rear extension                    |

#### **Part 2: Climate Change Mitigation measures**

|                                                                                                                                                                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Please respond to the following questions considering the measures set out in the Climate Change Guidance note:                                                                                                         |
| Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)                                    |
| Increased walls, floor and ceiling insulation thickness.                                                                                                                                                                |
| Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3) |
| Materials to be sourced from local suppliers and merchants.                                                                                                                                                             |
| Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)                                                                                                            |

LED downlights.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

The extension is a single story to the rear of the property and designed / positioned and therefore orientated accordingly.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

N/A  
Single story extension - existing outlets retained.

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

N/A  
Single story extension - existing outlets retained.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

N/A  
single story - garden to remain

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

Local contractors and suppliers to be used.
