Am sending this to you so that it can be forwarded to the right person e.g. the council , our MP .or the Examiner . I do not want that on or near our estate , a 60 feert pole , absolutely ridiculous , how it got through planning I dont know , What is its purpose , we already have a good communication system , high speed internet , choice of suppliers , further down Lindley moor there is a huge array of commsunication dishes for emergency services and other systems . On t6he opposite side of the road ther are somewhat smaller poles carrying various unknown systems .. What is going on ?.
