Kirklees Council

[By Email: DC.Admin@kirklees.gov.uk]

26th October 2023

Dear Elenya

PLANNING APPLICATION: 2023/62/92541/E

Erection of detached garden room; Sandhurst Court, 7 Spen View, Dewsbury Moor, Dewsbury, WF13 3PZ

Thank you for your notification of the 25th October 2023 in respect of the above.

The Coal Authority is a non-departmental public body sponsored by the Department for Energy Security and Net Zero. As a statutory consultee, The Coal Authority has a duty to respond to planning applications and development plans in order to protect the public and the environment in mining areas.

The Coal Authority Response: Material Consideration

I have reviewed the proposals and confirm that the application site falls within the defined Development High Risk Area; therefore within the application site and surrounding area there are coal mining features and hazards which need to be considered in relation to the determination of this planning application.

Our records indicate that the site is in an area of shallow coal workings. Where shallow coal workings are present these may pose a potential risk to surface stability and public safety.

The submission is supported by what it titled a 'Coal Mining Risk Assessment' but is actually a very brief document which identifies that minimal ground works will be required to erect what the author of this document calls a lightweight timber structure. The documents author notes that the structure is paired with a minimally invasive 'ground screw' substructure which pose minimal disturbance to the site.

On the basis that the application is supported by documents which confirm minimal ground works will be necessary to facilitate its erection on site the Planning team at the Coal Authority have **no objection** to this proposal.

Mine Gas

It should be noted that wherever coal resources or coal mine features exist at shallow depth or at the surface, there is the potential for mine gases to exist. These risks should always be considered by the LPA. The Planning & Development team at the Coal Authority, in its role of statutory consultee in the planning process, only comments on gas issues if our data indicates that gas emissions have been recorded on the site. However, the absence of such a comment should not be interpreted to imply that there are no gas risks present. Whether or not specific emissions have been noted by the Coal Authority, local planning authorities should seek their own technical advice on the gas hazards that may exist, and appropriate measures to be implemented, from technically competent personnel.

It is requested that the following notes are included on any planning permission granted.

Note 1

The proposed development lies within an area that has been defined by the Coal Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Coal Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain a Coal Authority Permit for such activities may result in potential for court action.

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Coal Authority on 0345 762 6848. Further information is available on the Coal Authority website at:

www.gov.uk/government/organisations/the-coal-authority

Note 2

In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

Please do not hesitate to contact me if you would like to discuss this matter further.

Yours sincerely

Melanie Lindsley
