| <p>I wish to object this application in the strongest terms.</p> <p>This venue has in the past caused significant noise pollution not just in the immediate vicinity but for miles locally until the early hours. It has so far been a once/twice a year event but one that has caused significant upset in the local community.</p> <p>This noise has been heard throughout new mill and beyond and we can hear this noise even through closed windows.</p> <p>This planning application will have a very significant impact on local peoples peaceful enjoyment of their home and right to live in a quiet residential neighbourhood.</p> <p>If you add the impact of a significant increase in traffic down a quiet, poorly lit lane will further add to disruption and potential for accidents.</p> <p>This is before we factor in the realistic possibility of anti-social behaviour arising from frequent weddings and parties. I walk my dog in this area and have seen the detritus and broken bottles etc left in the road etc after one of these events.</p> <p>This will also have a detrimental impact on the local area as in the past we have had the equivalent of an outside festival in the grounds which is not in keeping with the locality.</p> <p>This will have a substantial impact on neighbouring properties and will impact on everyone within the locality.</p> | |
