Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
The planning proposal should be denied for the following reasons: TRAFFIC: the only access road is Spring Lane which is narrow in places and is used by many walkers ,there is no footpath. The increased volume of traffic (visitors, catering trucks, bands) would make the road dangerous for pedestrians. There is also a no right turn at one end of Spring Lane because of the dangerous bend. NOISE: based on previous parties and events at the property, the noise (band, fireworks, traffic)would be loud and would go on until the early hours. This being detrimental to the sleep and therefore health of other residents in the surrounding area. It is a rural area with much wildlife which needs our protection.
