This is the third time this application has been submitted and materially nothing has changed. The raising of the food height takes it above the roofline of the other buildings in the area which it was meant to have been built sympathetically alongside. The Inner Hey is a grade 2 listed building which it borders, The window in the end elevation still overlooks the Inner Hey side and rear garden. We already have a 10 ft fence that attempts to prevent the garden being overlooked as the property was not built to the original plans. I don't believe any of the minor changes that are in this application have dealt with the planning issues raised in the decision document of the previous 2 applications and so don't see how this application can be considered.
