<p>commenting on behalf of Rosenbauer UK - located in Meltham, close to the proposed site. For over 2 years we have had intermittent mobile phone coverage at our head office in Meltham. This has caused major disruption to our business operations. We have had to set up staff to work from home in order to receive reliable mobile phone coverage. This comment is fully supporting the decision to build this new mast at the proposed location. It has never been acceptable to have a mobile phone mast running from a diesel generator in close proximity to a built up area, so in my opinion there is no solution other than to build this new mast to ensure connectivity for businesses and residents in the area.</p>
