Hi

Reference number: 2023/92795

A letter was received for the above reference number about an erection of single storey rear extension and alterations at 37 Upper George Street, Springwood, Huddersfield, HD1 4AW.

we wanted to request if this application does not go ahead, as it will cause more problems with parking.

We already sometimes struggle to find parking near where we live on the street especially around prayer times which is 5 times a day as we live very close to the mosque that is on the street. If the planning officer was to come and see especially on a Friday afternoon prayer for themselves they will realise how difficult it can get.

If this goes ahead we will have even more difficulty in finding a car space as if it gets extended there will most likely be more people with their own cars. Even it will be difficult for them to find a car space which can maybe lead to arguments which we don't want to happen. Many already living on the street have more than one car and it's not a very long street which am sure you are aware of. If the street is filled with cars it can be difficult to get out, having to use the dentist car park becomes hard as not enough space both in the dentist car park and on the street.

Children come to read in the evenings at the mosque on the street and when they get picked up even that makes it difficult to find a car space.

With the work that will take place it will get noisy. All of this and the above mentioned is causing a lot of stress.

If you can take the above into consideration and for this not to go ahead that would be appreciated.

Thanks.
