<p>A number of earlier objections raised by local residents relate to the site layout having 3 story properties situated on the boundary edge (despite the assurance from the developer in the Statement of Community Involvement that this wouldn't be the case). The new plans still appear to show 3 story properties (plots 83-87) on the eastern boundary edge which will have a detrimental visual impact on neighbouring properties and the local streetscene in general. In view of this I think the proposed application, in it's current state, should be rejected.</p>
