<p>Firstly the Gomersal area is becoming over developed in general. And with more of these vast developments on the local Green belt land it is spoiling what people enjoy within the area and what it is known for along with the negative impact on wildlife on the proposed site and neighbouring green belt land. Another development of this magnitude within the village is just not in keeping to the area. 87 houses!!</p> <p>The main issue will be the traffic. Cliffe lane is already used as a thorough fare to cleckheaton and adding a possible 2 further vehicles per proposed property, delivery drivers, waste collections and visitors, this will add a serious amount of increased traffic to what are already narrow roads in all directions from the proposed site entrance.</p> <p>This does not include the construction period.</p>
