

SCALE:

Impression of increase to wall height to a maximum (depending on the rise and fall of the natural stone/base) of 2.9m (1.9m from Mill Moor Road side) running across the full 9m on the South and sloped down to 4m on the West.

Wall to be cemented as required to give stability. Topping stones to be cemented on. Not shown as planning application not applicable/required is for a smaller inner wall to run across the front top edge of the base stones at a height of approx. 18" and tie into the wall on the right and left to give both stability and also create a raised plant bed.

See OH5 for proposal of materials to be added..

KEY:

- = Mill Moor Road Level behind the wall
- = Original Height of wall
- = Point of view photo taken from
