I have read all the comments on here for and against. The for comments are laughable due to the following: 1. How many jobs are you going to create in these storage containers the max people that can actually work in there will be two for each one. 2. Some have commented that they will have no need to travel to Halifax or Bradford. To be honest I have never heard of people travelling to storage containers to Halifax and Bradford for a meal out . Restaurants I would say would be a logical visit. 3. What revenues? No revenues at all and what is it going do to for the community. Apart from cause litter and youths loitering about. Am here now looking at this monstrous image of storage containers whilst writing this. Looking at the roof which is metal and sloping onto Bradford Road. When it rains I can see there is no guttering in place so all the rainwater will go onto the street or road. Also has any risk assessments been carried out is there two exits in and out in case of a fire. Where is the fire point going to be located. The parking facility are already absurd so have the parking for the staff for all three containers been appointed and the additional customer parking. On match days whether it be rugby or football it's unbelievable how the traffic and parking spaces get clogged up. In addition to this the temporary railway station is going to open up on Alder Street. They will be even less parking available on match days which will make more chaos with the spaces allocated to these units. Litter will bring a lot of problem causing hazards on made road. Where will the staff changing rooms be and staff toilets. As hygiene will they be using the same sinks in the kitchen. This was not properly thought through. It will be appalling if this is passed it will contribute to more rats running around this area as I can't see a proper management being done for the waste these 3 storage containers will contribute.
