Subject: 8 cross church street paddock HD14SN

I have just returned from time away and have been asked to comment on the above application number but as the consultation date has ended I have pointed out I cant do this

So could you and the relevant committee consider the proposed height of the proposed pitched roof ? I have also been asked the South wall , If it will be reduced by your 1 Meter from Boundary Criteria as the North facing side has and if not why not as they say " whats good for the Goose is Good for the Gander " the South Facing Wall is Overbearing and Claustrophobic and makes seem like a courtyard and also takes away what used to be a limited outlook to Zero outlook

The south facing wall of the First new build which has been refused by Kirklees and the Secretary of state
Intimidated

Yours
