This application if approved will cause additional problems in and around the centre of Kirkburton from a road safety concern and additional on road parking . The site does not have enough parking currently for the staff employed there , and the proposed additional buildings and car parking spaces on the application site are not sufficient to provide to ease the current on road parking problems and road safety concerns. With an additional entrance or exit onto North road and anticipated buildings associated with the planning application work opposite terraced cottages and near full time parking on that section of North road opposite with the noise, dust and building work will cause a major problems for through traffic entering and exiting Kirkburton village. Kirkburton village has problems encouraging the local traders and visitors to use the current facilities available as there is no short term parking available near the village centre in the normal working week due to having a multi national company situated in the centre along with other much smaller businesses all using on road parking causing severe problems on the feeder roads into the village.
