<p>My main objection is to the height of the proposed building. Why does it have to be the same height as the existing mill building? As there been any consideration, to what affect this building, due to its height, would have on the wind flow around the area. The existing building, already channels the wind down back station road.</p> <p>The size of the building, must block some light from the existing houses in the area and spoil the view.</p> <p>Another concern of mine, is the amount of extra traffic that would be using back station road. Its not easy, as it is, due to the parked cars and the heavy vehicles, that use it at the moment.</p> <p>I hope the planning will be rejected, but if not, then the height of the building is reduced.</p>
