| <p>The building of a 6 storey residential building adjacent to Ledgard Mill will have a detrimental impact on my current living conditions. The construction of 76 new apartments will place additional pressure on an already congested road (Back Station Road) and if access via the narrow, busy entranceway is to remain the same I believe it is dangerous and ill thought out. The views of the hills and fields I enjoy from my apartment will be obstructed by the new building, I will be facing the new flats and they will be looking back at my balcony. The number of hours of sunlight I currently experience will be easily halved. The pressure on the facilities is already overstretched and not enough for the existing residents before the additional residents move in, an increase in facility provision will still not be enough. The banks of the river on which the flats will be built have broken numerous times in the last 8 years, I worry for the safety of the new and existing premises.</p> | |
