<p>The proposal will result in additional strain on amenities in the form of parking - two spaces are shown to the rear on the application and remaining on the front. As the Council have confirmed in correspondence on the issue of parking, they are unable to adequately manage permit parking areas as seen with continued problems resulting from the redevelopment of 129 Trinity Street to 4 separate apartments with similar levels of parking. Whilst this proposal was refused, it has still progressed and led to consistent parking of cars and vans without permits in permit spaces, meaning others with permits if not back at the right time do not have the parking available they have had to pay for for which parking attendants only sporadically check during the day, when they are not there and it is not a problems but left during evenings and weekends.</p> <p>To be consistent, this proposal should also be refused as per the proposal on 129 Trinity Street</p>
