<p>Hi, as the property is in its current state the windows that are looking into my garden are all frosted. I believe that when converted to flats the windows will be defrosted which is an invasion of our privacy as there will be multiple flats that will be able to look into our garden. Also there is already no parking available on green lane and there's always a traffic jam most of the times and I believe the property in question doesn't have enough space to accommodate that many cars.</p> <p>There is already double yellow lines which the current residents of the street ignore.</p>
