The graph displays the vertical alignment of a proposed road. The Y-axis represents the Level (71 to 72), and the X-axis represents Chainage (0+000 to 0+15000). The existing ground level is shown as a green line, and the proposed road level is shown as a red line. The level difference between the existing and proposed levels is indicated by a blue line. The proposed alignment starts at a level of 72.00 at chainage 0+000 and ends at a level of 71.00 at chainage 0+15000. The level difference is 0.029. The graph also shows a horizontal geometry section with a length of L=15,000.

The graph illustrates the vertical alignment of a road project. The Y-axis represents the Level (elevation) from 64 to 67. The X-axis represents the Chainage from 00+000 to 00+899. The existing ground levels are shown as a green dashed line, and the proposed road levels are shown as a red solid line. The proposed levels include a vertical curve with the following grades: 1.2%, 3.94%, 1.13%, 7.93%, 1.13%, 7.93%, and 1.78%.
