After receiving a letter from the planning department about the Storthes Hall Development I decided to look at the plans online. The transport plans concern me. The speed limit on the lane is 40mph and it is difficult now to get out of my drive safely with the amount of traffic that passes daily. With 261 dwellings and dual access at both entry and exit points to the development the extra traffic is going to be dangerous at the speeds cars travel up and down the lane already. Also the suggestions regarding walking, cycling etc. ok for leisure but not if you need to get to work regularly. The public transport with bus times of every 2 hours is also not compliant with getting to work on time. The junction at Dean Bottom is also difficult with the amount of traffic already using Storthes Hall Lane with narrowing over the bridge, parked cars at the junction and turning right onto the A629 is nigh on impossible at certain times of the day. Surely the infrastructure should be sorted especially before the heavy building vehicles start moving up and down.
