Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
I wish my address and name is anonymous. Little north spring wood- It is unacceptable to lose any ancient natural habitat like little north spring wood, It has been here before any of us was born and we should protect these natural habitats as once it is gone it's gone forever and no going back and what for the sake of a few extra houses being built. I think this would be a travesty and would be a great shame. Traffic - With the football club and hockey club, the 261 homes with at least 1 car each, the dog walkers, the retirement village with 300 homes with a car each and a lot of the current traffic, the amount of traffic on Storthes hall lane will be overwhelmed. The penistone road junction will become a danger even more than it is now. The narrow sections of the lane there has been many near misses and many crashes on this lane with the speed of drivers easily excessing 40 mph regularly And the danger of the residents who cross the road to get access to the woods to walk in, it is bad enough as it is. The state of the road is shocking as it is, what will more traffic do to it. The bridge at the bottom of the lane is very narrow with no public footpath which is a danger to the public, there has been many near misses with cars passing through regularly. The cars for the football and hockey club on nights and weekends will most likely end up parking in front the houses on the lane which will disrupt the residents of Storthes hall lane.
