Subject: 2023/93704 land northwest of urban Terrace

Hi

On the information provided prow would likely object to the application

The application gives no details of the footpath which is within the development site other showing it has a line and indicating it is 1.5 m width. Prow would insist on a minimum width of 2 m especially as the proposed design indicates that the adjacent land will be developed and the adjacent land is within the LP development site

LRR indicates that the path is within the title of the developers.

Prow would wish to see sections, cross and long including the path, details of the boundary fences, surfacing and any path improvements

Sharon
