Previously unstable land- provision required to remove all waste and surface water from site-greatly important. 3 storey properties?!?! Let's not have a repeat of the catastrophe at blue hills regarding foundations, where is the detail for stabilising the site? This site favours low impact development due to its history and proximity to village centre amenities-bungalows?- contingency for the elderly and infirm? The green spaces-to encourage nature and a place for quiet reflection? Or residents dog pooping ground? Can this be confirmed from the outset?-who will maintain it?
