The building is in front of my house and it is already blocking my view. these are also may other problems with the building . this is not been used as a storage unit its is a car repair garage. it has been operating for many months. these are care parked all over William street and George street. It has made it really hard for me to even park near my house when i get home from work as these are lots of cars from this garage been parked these waiting for repair. the owner is applying for planning permission from a storage unit to be converted to a garage witch clearly is already been used as a repair garage. They are open from 9 am till late night and these is a lot of noise from these. They have also applied for a side extension and access in to William street. The building has had a side extension built after the building was originally built. Now applying for side extension dose not make sense. Giving access on to William street will make this street a busy street and this is a residential are where children play and will not be safe for children to play outside when these are going to be more cars in and out of the street this is a serious health and safety issue that should be noted. also the owner has cut down some headages and trees from side of his property and dumped them next to his property and they have also out ages on to William street side and has covered more then what is property is. They have been trying to cover more land that is not even there property. Having a car repair garage in this area is not safe for the residents and also for children it will make this a busy are with lots of car. A this moment of time these is a struggle for parking for the residents.
