Subject: Industrial building Westgate flush mill 2023/93796

Categories:

To whom this may

I believe the erection of industrial building at flush mill, Westgate, Heckmondwike WF160EN will cause many problems for the residents on Omar street. As the building may be used for industrial process such as B2 (heavy industry) it can create high air/noise pollution volumes, hence B2 areas are located away from residential areas. There is concern of hazardous material and smells too.

The residents will also be affected by the structure of the building as it will be overshadowing causing loss of light into the homes as well as loss of privacy as well as loss of view. All of these issues can decrease the values of the properties. Hence we do not agree with the new plan.

The owners of number 10 and 12 Omar street Heckmondwike WF16 0EL
