Subject: Planning objection 2023/93796

Building a monstrosity of a building adjacent to our properties on an elevated gradient will destroy our natural sunlight on Omar Street. It will increase traffic heavily on an already, very busy road (Westgate) which impedes on residents getting in and out of our street. The noise of machinery and staff is already horrendous. We have alarms going off perpetually at all hours of the night. We don't need or want anything that exacerbates all of the above. Secondly it is not "my perception", it is that of our entire street that property values will be detrimentally effected should planning permission be granted.
