I live nexxt door to this and i have 3 things I am concerned about with this developoment. 1: the taking down of the bushes at the top of my garden.i dont want this to happen. These bushes have been there for at least 45 years and i dont want them removing I have recently got a dog and i have spent money and time to make sure the garden is secure for her .If these are taken down she could escape and also get hurt during the building process 2: I know there is talk of taking number 43 wall at the bottom down (the one by the road) I am worried this will affect my wall These walls have been there for at least 150 years and are dry stone walling .Would the removing of 43 wall leave mine very vunerableto falling down. i have just had a fence built on top of the wall and tall gate.This is so my dog doesnt get out of my garden onto the road 3: A.t the end of 43 there is a right of way.This through 43 gate and up the path at side of number 43 steps This is so we can go to our back door and garden. if we dont have access to this path. anything to go to our back garden etc has to come through my house This is not practical ,when i am having to have bricks brought through my house etc. This is the right of way for myself at 45 and number 47 We have the deeds stating this . The path to our houses should continue upwrds to the wood behind us I need reassurance that my dog will not get out of my garden,into 43 and get hurt during thr building work.On warmer days i usually have my front door open and spend time in thre front garden Am i suppose to lock my dog inside
